

Dear Sirs of the FCC,
I have been informed that there is a proposal to limit the content that can be provided by satellite radio. I have been a happy satellite radio listener for almost 2 years. I see no logical reason to limit the content that satellite radio can provide. Satellite radio is a subscriber-only service, and I am paying my hard-earned money to hear all content, including local information. It should be up to me to decide what content I listen to, not censored by any other board (such as the NAB). I ask that you reject petition HR 4026.

Respectfully,

Christine Kellogg
